We have an EPA DATA Team Member deploying today, that should help.

Thanks!

One little hiccup on the 3rd data person to Durango. Suddah Gravas / Techlaw was all set to move but Region 3 can't release him from a site until the weekend. Brad and Janine are working to get someone there sooner. I'll keep Lucotch updated with developments.

You all are really rocking this. This is the data machine I have seen several times before and therefore always knew Weston had. I think it's great that Janine is involved. John and others can learn a lot from her.

Marty:

It's been a long day but I wanted to circle back with you from this morning. Thanks for the great feedback, that means a lot. I've relayed that to our team. If you need anything, don't hesitate to call me. I will be making a short trip to Durango tomorrow and Friday to meet with our team (not on the clock) and to see that we're meeting the

EPA IC site team's expectations as well. I'll be out of pocket on a plane from about 0700-0900. I'm available any other time.

I must admit, I didn't see your late night email about contact with MECx validators. I think you sleep even less than I do! I think we have that in place with Lucotch and Moira Pryhoda coordinating. Let me know if that request is still hanging.

Thanks,

Dave
